**Section 4 - FIRST AID MEASURES**

**Inhalation**

If adverse effects occur, remove to uncontaminated area. Give artificial respiration if not breathing. If breathing is difficult, oxygen should be administered by qualified personnel. Get immediate medical attention.

**Skin**

Wash with soap or mild detergent and large amounts of water until no evidence of chemical remains (at least 15-20 minutes). Get immediate medical attention. Place contaminated clothing in a closed container until laundered or discarded. Contaminated clothing should be removed and laundered before reuse. Notify person laundering clothing of contaminant's hazardous properties. Discard contaminated leather goods.

**Eyes**

Immediately flush eyes with plenty of water for at least 30 minutes. Hold eyelids away from the eyeball to ensure thorough rinsing. Get immediate medical attention.

**Ingestion**

If swallowed, drink plenty of water, do NOT induce vomiting. Do not give anything by mouth to unconscious or convulsive person. Keep warm and at rest. Get immediate medical attention.

**Note to Physicians**

Signs and symptoms of CNS depression, confusion and convulsions should be considered in the assessment and treatment of victims of exposure.

**Section 5 - FIRE FIGHTING MEASURES**

See Section 9 for Flammability Properties

**NFPA Ratings:**
- **Health:** 1
- **Fire:** 0
- **Reactivity:** 0

**Hazard Scale:**
- 0 = Minimal
- 1 = Slight
- 2 = Moderate
- 3 = Serious
- 4 = Severe

**Flammable Properties**

Negligible fire hazard. This material is a moderate reducing hazard. Mixtures with urea ammonium nitrate or ammonium nitrate solutions should not be allowed to dry. Dry mixtures of these substances, or other oxidizers, constitute a potential fire and explosion hazard.

**Extinguishing Media**

- Carbon dioxide
- Regular dry chemical
- Regular foam
- Water
Fire Fighting Measures

Move container from fire area if it can be done without risk. Cool containers with water spray until well after the fire is out. Do not get water directly on material. Avoid inhalation of material or combustion by-products. Stay upwind and keep out of low areas. During a fire, irritating and highly toxic gases may be generated by thermal decomposition or combustion.

Thermal Decomposition Products

Combustion: ammonia, ammonium compounds, hydrogen sulfide, oxides of sulfur, sulfur

Thermal Decomposition Products

Combustion: Heating to dryness may cause the release of ammonia, ammonium sulfate, hydrogen sulfide, sulfur and oxides of sulfur. Ammonia and hydrogen sulfide may form flammable mixtures with air.

Acids: sulfur compounds

Sensitivity to Mechanical Impact

No

Sensitivity to Static Discharge

No

Water Release

Keep out of water supplies and sewers.

Occupational spill/release

Do not touch spilled material. Stop leak if possible without personal risk. Small spills: Absorb with sand or other non-combustible material. Small dry spills: Collect spilled material in appropriate container for disposal. Keep unnecessary people away, isolate hazard area and deny entry. Notify Local Emergency Planning Committee and State Emergency Response Commission for release greater than or equal to RQ (U.S. SARA Section 304). If release occurs in the U.S. and is reportable under CERCLA Section 103, notify the National Response Center at (800)424-8802 (USA) or (202)426-2675 (USA).
**Section 7 - HANDLING AND STORAGE**

Storage Procedures

Store and handle in accordance with all current regulations and standards. Store in a cool, dry place. Store in a tightly closed container. Store in a well-ventilated area. Avoid heat, flames, sparks and other sources of ignition. Empty containers may contain product residue. Do not reuse containers without adequate precautions. Keep separated from incompatible substances. Store below 88 C. Store in lined, coated, or stainless steel equipment. Do not install immersion heaters in storage tanks. DO NOT ALLOW TO DRY!

**Section 8 - EXPOSURE CONTROLS / PERSONAL PROTECTION**

Component Exposure Limits

ACGIH, OSHA, and NIOSH have not developed exposure limits for any of this product's components.

Ventilation

General or local exhaust ventilation and other forms of engineering controls are the preferred means for controlling exposures. If ventilation cannot reduce airborne concentrations below acceptable limits, appropriate respiratory protection should be used.

PERSONAL PROTECTIVE EQUIPMENT

Eyes/Face

Wear splash resistant safety goggles with a faceshield. Provide an emergency eye wash fountain and quick drench shower in the immediate work area.

Protective Clothing

Wear appropriate chemical resistant clothing.

Glove Recommendations

Wear appropriate chemical resistant gloves.

Respiratory Protection

A NIOSH approved air-purifying respirator with an appropriate cartridge or canister may be appropriate under certain circumstances where airborne concentrations are expected to exceed exposure limits.

Appropriate respirator selection should be made by a qualified professional as part of a comprehensive respiratory protection program as described in 29 CFR 1910.134.

Protection provided by air-purifying respirators is limited and should not be used in atmospheres deficient in oxygen or where airborne concentrations are immediately dangerous to life or health.
